

HELP US LEARN ABOUT LANGUAGE AND COGNITIVE RECOVERY POST-STROKE!

We are recruiting stroke survivors for a study exploring language and cognitive recovery in left and right hemisphere stroke.

IRB 2024-1983 Left Versus Right Hemisphere Executive Function Study

Who can participate?

- Adults, 18 years or older, *with* history of left or right hemisphere stroke.

What does participation involve?

- One remote testing session lasting approximately 2-3 hours
- Answer questions about your language and cognitive abilities
- Complete language and cognitive pen/paper tasks
- Complete cognitive computer-based tasks
- Compensation: \$20/hour

Where does this study take place?

- Remotely via Zoom.

Principal Investigator:

- Arianna LaCroix, PhD CCC-SLP
