## HELP US LEARN ABOUT TREATMENT FOR APHASIA!

We are looking for individuals to help us learn whether music listening can treat language and cognitive difficulties in people with aphasia!

### Who can participate?

- Adults who have aphasia after a stroke
- 18 years or older

### What does participation involve?

- Answer questions about your language and cognitive abilities
- Three online sessions that occur at 8-week intervals that last 2.5-3.5 hours each
- You may also be asked to meet with a music therapist/SLP once a week and complete 30 minutes of music or audiobook listening a day
- Compensation: \$50.00 for completing each online session

### Where does this study take place?

- Online via Zoom

### Principal Investigator:

- Arianna LaCroix, PhD CCC-SLP
- IRB-2025-1005 Treating attention and language in post-stroke aphasia using a music-based intervention
