

EMERGENCY ROOM DOCTOR

"WHEN YOU'RE
HUNGRY FOR
SOMETHING, THEN
YOU'RE GOING TO
DO WHATEVER YOU
CAN TO OBTAIN
YOUR GOAL."

DR. ARABIA MOLLETTE

Pronunciation: (a-ray-be-a mull-let)

Life: 1981- Present
Location: New York, NY
Known for: ER Doctor,
 Teaching medicine
 globally, & Serving the
 community

MATH HERO

Doctors like Arabia use math to:

- Learn about a patient's health by reading charts and graphs.
- Evaluate how much medicine a patient will need.
- Avoid giving a patient too much medicine by prescribing an amount less than needed if the exact dose is not available.

DOCTOR AND TEACHER

- Arabia Mollette is a doctor. A doctor's goal is to help sick people get better. Most doctors work in hospitals or private offices.
- Arabia works in the hospital's Emergency Room (ER) which is the first place people go when seeking help. All doctors promise to "do no harm" when treating patients.
- Arabia dreamed of becoming a doctor since age 11. She attended medical school in Havana, Cuba. She did not speak Spanish when she moved to Cuba but learned while studying there for seven years. She uses her life story growing up in the community she serves to connect with patients.
- Arabia teaches emergency medicine around the globe and hosts a health and wellness podcast called *The Visit*.
