School of Nursing

Doctor of Nursing Practice Inquiry

Project Handbook

August 24, 2026

Introduction

This handbook has been developed to serve as a roadmap to the processes, procedures, and requirements of the DNP Practice Inquiry Project. The DNP Practice Inquiry Project is developed, implemented, and **throughout the program**, supported by content delivered across several courses.

Overview of DNP Practice Inquiry

The DNP program culminates in the completion of a scholarly Practice Inquiry Project over a minimum of three semesters. This project is a comprehensive, integrative practice experience that reflects the synthesis of program course work and mastery of expert practice knowledge in translating current research to improve nursing practice or healthcare outcomes for patients, families, populations, or systems.

DNP Practice Inquiry Projects should (a) focus on a clinically significant practice issue from a system or population perspective and (b) be data-driven. Specific topics may center on quality improvement, practice innovation, implementation of evidence, transfer of processes across entities, etc. Topics should be selected in conjunction with the DNP Chair.

Each student collaborates with an agency to address a real-world clinical problem or health issue. The project allows the student to demonstrate clinical expertise and competencies in organizational leadership, system analysis, program assessment, evaluation, and practice change. To complete the requirements for the DNP degree, the student must complete and submit all final project deliverables: (a) an executive summary of no more than 12 pages; (b) a 5-7 minute recorded poster presentation created in PowerPoint and incorporating the Cameo feature; and (c) a publishable article submitted to a peer-reviewed journal or a reputable non-peer-reviewed professional journal. The recorded PowerPoint poster must introduce the practice problem, discuss project outcomes, and address the project's financial/economic, system, practice, and policy impact.

DNP projects can take the form of a/an:

- Evidence-based intervention or change initiative
- Program development and/or evaluation related to clinical practice
- Quality improvement initiatives
- Implementation and evaluation of evidence-based practice guidelines
- Design and evaluation of new models of care

- Policy implementation, analysis, revision

Consistent with the AACN DNP Implementation Task Force recommendations documented in the August 2015 white paper, the following topics/approaches do not meet the requirements for a clinical doctorate:

- Integrative and systematic reviews alone (project implementation and valuation is needed)
- Portfolios
- Projects focused on the educational process, the academic curriculum, or educating nursing students

A shared feature of these examples is research evidence and systems leadership to improve healthcare outcomes, whether at the practice, patient, or health system level.

Typical Development and Progression of the DNP Practice Inquiry Project

	Years 1 and 2 DNP Chats Project Seminars	NUR 680	NUR 687	NUR 689
Identify interest area	X			
DNP Project committee formation: DNP Project Chair Faculty Member/Expert Member Organizational/Agency Member	X	X		
<u>Needs assessment</u> identifies the challenges/problems leading to the proposed project.	X	X		
<u>Identify Culminating project</u> : describe the project and how the project intervention addresses at least one challenge/problem that influences healthcare for a significant number of persons		X		
Review of the literature		X		
Proposal development		X		
CITI Training OR complete in Nursing Research Course (Must be within 3 years)		X		
IRB preparation		X		
IRB submission		X	X	
Project implementation			X	
Data/outcome analysis			X	
Project evaluation (facilitators and barriers)			X	
Dissemination of findings: - Executive Summary (maximum 12 pages) - Recorded Poster Presentation (5-7 minutes) - PowerPoint with Cameo - Publishable Article and Journal Submission			X	X

DNP Project Committee

Doctor of Nursing Practice (DNP) Degree Plans of Study must include a Practice Inquiry Project that provides evidence that the student can expertly appraise evidence relevant to practice. The Practice Inquiry Project is a faculty-guided scholarly experience that provides evidence of critical thinking and the ability to apply evidence-based principles through problem identification, proposal development, implementation, and evaluation of a clinical problem.

Role of the DNP Committee Chair

The purpose of the Committee Chair is to guide the student through decisions to efficiently and effectively build the foundational work, preparation, and processes that culminate with the required Practice Inquiry Project.

The Committee Chair ideally should have expertise in the topic of the student's DNP Practice Inquiry Project but is not necessary, as there may be another member of the committee who has expertise in the topic area. As the expert in the process, the Committee Chair will be able to efficiently guide the student through each phase of the project, including determining the type of project, the scope of the project, and the committee members whose areas of expertise will complement the project.

Faculty who are assuming the role of Committee Chair must have graduate school regular faculty certification and have served as a committee member on at least one graduate committee in which the project is completed. Faculty should be aware of the rules from the Office of the Vice Provost for Graduate Students and Postdoctoral Scholars that govern professional doctorates.

Specific roles and responsibilities of the faculty member who takes this role with new DNP students include:

Socialization into the doctoral role

- Provide support and encouragement to the individual students as he/she progresses to completion of the DNP
- Encourage and facilitate the process of student communication with committee members
- Mentor new committee members into the role of committee chair
- Reinforce student's responsibilities as adult learners

Advising of the courses and cognate residencies

- Understand the student's competencies as they relate to coursework and project topic and scope
- Help students determine requisite knowledge in the processes of the required courses and cognates and residencies needed for their DNP project.
- Help the student determine appropriate Practice Inquiry Projects for their portfolio (topic, scope, location, using existing data)
- Assist the student in finding committee members who can make a valuable and unique contribution to the project
- Help students identify small grants, fellowships, attendance, and presentations to conferences, and seminars relevant to their educational and career goals

- Assist the student with making connections with professionals and opportunities relevant to their DNP project

Project Processes/Construction

- Assist the student in the importance of understanding and meeting the established timelines (as identified by the Checklist, grad documents)
- Participate with the student in meetings with the committee members, and assist the student in prioritizing the expectations discussed during those meetings
- Assist the student in acquiring IRB approval for their DNP project
- Be available to meet regularly (e.g., monthly/weekly) with the student during the writing phase of the project
- Maintain an easily accessed record of communications with the student that describes feedback provided to students and expectations for addressing the feedback. (These records give evidence for authorship and, if needed, student appeals)
- Ensure the student understands the value of the process of multiple revisions to each component of their project
- Ensure that the executive summary, publishable article, evidence of journal submission, and final 5-7 minute recorded poster presentation are satisfactorily completed before asking committee members to sign the GR-20 form provided by the Graduate Program Administration Specialist.

Project Submission/Post Graduation

- Serve as the corresponding author for the project article and facilitate submission, journal correspondence, and post-graduation revisions in collaboration with the graduate.
- Facilitate presentations from the project at regional or national conferences
- Assist the student in making professional connections that will serve their continued professional growth after graduation
- Maintain communication and facilitate the transition from graduate to alumni of the program: using these opportunities to both encourage connectivity to the school while supporting graduates in developing their new professional roles

Role of the DNP Committee Co-Chair

The purpose of the Committee Co-Chair is to act in tandem with the Committee Chair to guide the student through a Practice Inquiry Project.

The Committee Co-Chair will coordinate with the Committee Chair to discuss the student's progress and mutually agree to mentor the student through the project. The Co-Chair will take an active role in providing support to the student as a content expert and/or project mentor. In the absence of the Committee Chair, the Co-Chair will act as primary and provide updates to actions taken to the Committee Chair.

Faculty members assuming the role of Committee Co-Chair must have regular graduate school faculty certification and have served as a committee member on a least one graduate committee in which the project is completed. The role of the Co-Chair intends to prepare the faculty member acting as Co-Chair to gain the experience necessary to become the Committee Chair for future students. Faculty should be aware of the rules from the Office of the Vice Provost for Graduate Students and Postdoctoral Scholars that govern professional doctorates.

Specific roles and responsibilities of the faculty member who takes this role with new DNP students include:

Socialization into the doctoral role

- Provide support and mentorship to the student
- Provide support to the Committee Chair in assisting the student through the DNP process
- Reinforce student's responsibilities as adult learners

Advising of the course and cognate residencies

- Reinforces the recommendations by the Committee Chair to the student to ensure completion of course competencies, help the student develop a Practice Inquiry Project, be an active committee member, and aid in encouraging the student to network with professionals and opportunities. Relevant to their DNP project

Project Process/Construction

- Reinforce with the student the importance of understanding and meeting agreed-upon timelines as discussed with Committee Chair
- Participate with the student in meetings with the committee members, and reinforce the student in prioritizing expectations discussed
- Support the student and Committee Chair through the IRP approval for the project
- Be available to meet on an agreed-upon time with the student and Committee Chair

Project Submission/Post Graduation

- Support publication of the student's DNP project and development of the final recorded poster presentation.

Role of the DNP Committee Member

The purpose of the Committee Member is to help the Committee Chair guide the student through decisions to efficiently and effectively build the foundational work, preparation, and processes that culminate with the required practice inquiry project.

The Committee Member will have expertise relevant to the methods or content area of the student's DNP project. The Committee Member will enhance the efficiency of the project process by guiding students in the conceptualization, design, methods, and synthesis of project information.

Specific roles and responsibilities of the faculty member who take this role with new DNP students include:

Advising

- Provide support and encouragement to the individual student as he/she progresses to the completion of the DNP degree.
- Alert the chair and students of any opportunities (e.g., conference or other) relevant to the student's work.

Project Processes/Construction

- Contribute content expertise to the project
- Collaborate with the student and committee chair in every phase of the Practice Inquiry Project, from developing the concept, methods, analysis, and synthesis of project information
 - Be available to meet regularly (e.g., quarterly) with the student during the writing phase of the project
 - Provide timely feedback to the committee chair and student
 - Maintain an easily accessed record of communications with the student that describes feedback provided to students and expectations for addressing the feedback. (These records give evidence for authorship and, if needed, student appeals)

Project Submission/Post Graduation

- Facilitate development, submission, and revision of publications from the DNP project, consistent with the agreed-upon authorship plan.
- Facilitate presentations from the project at regional or national conferences
- Assist the student in making professional connections that will serve their continued professional growth after graduation

IRB Approval

All projects require approval by the Institutional Review Board through Purdue University and/or the organization the project is being conducted. Even if human subjects are not involved (ex., data mining, etc.), IRB approval is necessary since the student is expected to present findings. The student is responsible for securing IRB approval with their committee.

DNP Practice Inquiry Project Final Deliverables and Report Format

The DNP Practice Inquiry Project must be (a) of publishable quality as determined by the DNP Committee, (b) well grounded in the available evidence, and (c) include the two required written deliverables outlined below, together with the required recorded poster presentation described in the next section:

- I. Executive Summary (maximum 12 pages)
 - a. Problem Statement and Significance
 - b. Methodology
 - c. Results
 - d. Discussion
 - e. Implications and impact (address each of the following domains)
 - i. Financial/economic impact
 - ii. System impact
 - iii. Practice impact
 - iv. Policy impact

- II. DNP Publishable Article - content, length, and format will follow the requirements of the selected target journal

The DNP article must describe a data-based scholarly project involving the analysis of new or existing data and must be written at a publishable-quality level. Before graduation, the student is required to submit the article to a peer-reviewed journal or a reputable non-peer-reviewed professional journal approved by the Committee Chair; acceptance before graduation is not required. The student will ordinarily be listed as first author, and the faculty Committee Chair must be listed as the corresponding author so the Chair can continue to coordinate journal communication and work with the graduate on revisions and resubmission after graduation. Other committee members may be listed as coauthors when their contributions meet applicable authorship criteria. Before submission, the student must receive written approval from the Committee Chair using the DNP Manuscript Submission Form and the DNP Authorship Guidelines Form. Evidence of journal submission must be provided as part of the final project record. MANUSCRIPTS SUBMITTED WITHOUT CHAIR APPROVAL WILL NOT BE CONSIDERED PART OF THE DNP PRACTICE INQUIRY PROJECT.

DNP Practice Inquiry Project Recorded Poster Presentation

- Each prospective DNP graduate must submit a 5-7 minute recorded poster presentation in PowerPoint by the final-project deadline established for the semester.
- The presentation must use a poster-style PowerPoint format and incorporate the PowerPoint Cameo feature so the student appears on screen during the recording.
- The presentation must introduce the practice problem and its significance and discuss the project outcomes.
- The presentation must address project impact in four required domains: financial/economic, system, practice, and policy.
- Students should be professionally dressed, speak clearly without reading the poster verbatim, and ensure the recording remains within the 5-7 minute time limit.
- The DNP Committee will review the recording and final written deliverables. Any revisions required by the Committee must be completed before the Committee confirms satisfactory completion of the project and authorizes the GR-20.

Guidelines for authorship

As a matter of professional integrity, scholars list each major contributor to work as a coauthor. Contributions by authors may include the conception of the work, writing, data analysis, and revision of the work. Students developing a paper or other work for external review should confer with their project advisor before the work begins. Student groups working on a paper or other project for external review should confer about authorship before beginning the work. These guidelines apply to ideas and papers submitted as part of coursework and are considered potentially publishable.

- Authorship may be a complex issue depending on whether the work was the idea of one person or multiple people and the type of contributions of each person.
- For student work developed with faculty support, the student will ordinarily be listed as first author. The faculty Committee Chair must be

designated as the corresponding author and will generally be listed as the second author, unless the agreed-upon order should differ based on actual scholarly contributions and the target journal's requirements.

- The School of Nursing Guidelines for Authorship Form must be completed and signed by the student and all listed authors before journal submission.
 - After graduation, the graduate is expected to continue participating in revisions and resubmission. As corresponding author, the Committee Chair may receive editorial decisions, coordinate responses to reviewers, and continue working with the graduate until final publication. Any change in author order must reflect each author's contributions, comply with the target journal's policies, and be agreed upon by the authors.
- Coauthors' names are important and vary depending on the journal and field of study. In nursing, the author's order typically signifies each author's contributions, and the order of authors should be agreed upon before the publication is developed
- Some journals require authors to formally list each author's role in the publication and provide guidelines about who should be included as an author based on their role in the publication
- Most publications require authors to sign certain assurances about the originality and contributions of authors to work presented, and certain laws protecting intellectual property apply

Guidelines for acknowledgment

Authors publicly thank those people and organizations that supported the work submitted for public presentation.

- Before acknowledging an organization or person, confer in advance with the person or organization whose name you intend to recognize publicly.
- Some organizations that provide grant funding will require acknowledgment and may have a preferred statement about how they wish to be acknowledged.
- Students publishing or presenting their project should acknowledge contributors who do not meet authorship criteria, with their permission.

DNP Practice Inquiry Project Checklist

The following items are tasks that must be achieved. The DNP student must work with their Committee Chair to identify all work required to progress from one phase to the next.

Preliminary Work: DNP Project Idea Development

1. Identify DNP Committee Chair no later than the semester before NUR 68000 Cognate Residency I, preferably before NUR 62400 Evidence-based Practice.
 - a. Use [Chair/Committee member Form](#) in NUR 51700, Doctor of Nursing Project Seminar, Doctor of Nursing Practice , to send to prospective faculty chairs and members of the committee and submit to the Graduate Program Administration Specialist.
2. Review the current DNP recorded poster presentation requirements and examples

available through the School of Nursing.

3. Identify two DNP Committee Members with the help of your DNP Committee Chair. Send the [Acknowledgement of Committee Membership Form](#) to the Graduate Program Administration Specialist
4. Participate in NUR 51700 Doctor of Nursing Project Seminar, Doctor of Nursing Practice (2x per semester)
5. Review Purdue Human Subjects website and complete Collaborative Institutional Training Initiative (CITI) training (www.citiprogram.org). Work with your DNP Chair to determine appropriate CITI training for your project

PHASE I: Planning

1. Design your project with the help of your DNP Committee Chair and NUR 68000, Cognate Residency I Faculty
 - a. Complete literature review
 - b. Develop methods for the project
 - c. Develop or utilize tools for evaluation of project outcomes
 - d. Develop timeline for completion of project
2. Prepare appropriate documentation (e.g., written description, PowerPoint presentation) for the committee to review and disseminate at least two weeks prior to the first committee meeting
3. Hold your first committee meeting to discuss your project design. Remember to have members sign the [Graduate Advisory Committee Report Form](#) and turn the completed form in to the Graduate Program Administration Specialist
4. Submit IRB through Cayuse
5. Provide IRB approval to the Graduate Program Administration Specialist

PHASE II: Project Implementation/Data Collection and Analysis

1. Implement project per IRB protocol
2. Collect the data after receiving IRB approval
3. After data collection is complete, conduct and finalize analyses
4. After results are finalized, hold a second committee meeting to review results and brainstorm points for the discussion section.
 - a. Have committee members sign the [Graduate Advisory Committee Report Form](#). Once completed, submit the form to the Graduate Program Administration Specialist.

PHASE III:

1. Complete the executive summary (maximum 12 pages) and submit it to the DNP Committee Chair for review.
2. Complete a publishable article formatted for the selected target journal and submit it to the DNP Committee Chair for review.
3. Revise the executive summary and publishable article based on feedback from the DNP Committee Chair.
 - a. Multiple revisions may be necessary
4. Work with your DNP Committee Chair to determine when you are ready to declare candidacy for graduation
5. The Graduate Program Administration Specialist must be notified about your candidacy prior to the beginning of the semester in which you anticipate graduating
6. Meet with the DNP Committee one to two weeks before the final project submission deadline.

PHASE IV: Dissemination

1. Submit the completed and approved executive summary (maximum 12 pages) and final publishable article to the Graduate Program Administration Specialist.
2. Create and record a 5-7 minute poster-style PowerPoint presentation that incorporates Cameo and is developed under the guidance of the DNP Committee Chair.
3. Submit the PowerPoint file and recorded presentation to all committee members for review at least two weeks before the final project deadline.
4. Submit the approved article to a peer-reviewed journal or a reputable non-peer-reviewed professional journal and provide evidence of submission.
5. The School of Nursing Guidelines for Authorship Form must be signed before journal submission, and the faculty Committee Chair must be listed as the corresponding author.
6. Complete all revisions requested by the Committee for the executive summary, publishable article, and recorded poster presentation.
7. Submit the final executive summary, article, recorded PowerPoint poster presentation, evidence of journal submission, and required forms to the Committee and the School of Nursing graduate office.
8. Submit the Manuscript Release Form and any other required final documentation.
9. Graduate!
